

### **REMARKS**

Applicant expresses appreciation to the Examiner for consideration of the subject patent application. This amendment is in response to the Office Action mailed November 30, 2004.

#### **Election/Restriction Requirements:**

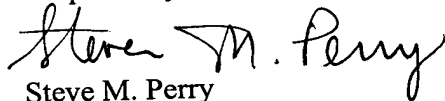

The Office Action has required restriction to one of the following inventions. Invention A is drawn to claims 1-22 and invention B is drawn to claims 23-26. Applicant elects invention A for examination purposes. Invention A has been classified in class 709, subclass 218.

The office action has also classified claims 23-26 into class 707, subclass 513. Applicant traverses this rejection on two grounds. First, the class 707, subclass 513 does not appear to exist in the patent classification system and applicant respectfully requests clarification. Secondly, claims 23-26 are focused on a cache enabled system for delivering personalized objects and content where the personalization scheme matches a company's business model. It is believed that these claims do fit under class 709, subclass 218 for computer networking between computers. Particularly, the cache component controls the delivery of the digital objects over a network.

The Commissioner is hereby authorized to charge any additional fee or to credit any overpayment in connection with this Amendment to Deposit Account No. 08-2025.

DATED this 25th day of January, 2004.

Respectfully submitted,

Steve M. Perry
